I APPRENTICE ELECTRICIAN

An excellent opportunity has arisen for an apprentice electrician to join the Seddon team.

What you'll do

- Carrying out electrical installations on domestic, commercial and industrial contracts.
- Install electrical circuits as well as panels, conduit, protecting devices, switches and equipment required to accommodate NICEIC Regulations.
- Test electrical equipment and parts for continuity, current, voltage and resistance.
- Installation, repair or replace electrical wiring, switch boxes, conduits, lighting and electrical parts.
- Carry out preventative maintenance and testing of electrical systems (including power distribution equipment).
- Comply with standard and procedures on site.

Have you got what it takes?

- Professional conduct and behaviours.
- Desire to complete relevant qualifications and assessments.
- Good attendance records.
- Ability to follow Health & Safety procedures.
- Manual dexterity.
- Good communication skills.
- Problem solving skills.
- Ability to adapt to a changing environment.
- Respect and abide by Health and safety Rules and Regulations
- Read, interpret and execute drawings and electrical code specifications
